

Need to monitor the location, operational data and movement of your unpowered gear on campuses, building and work sites? Asset Trakka will track them for you.

Powered by a rechargeable lithium battery (with motion/vibration sensors to conserve charge) and installed in an all-weather protective casing, our Enduro Drive offers theft protection, real-time tracking and telemetric data.

And with OTA firmware, we continually update tracking capabilities.

Standard features include:

- Construction within an IP65 all-weather protective casing
- 2-3 year battery life, trickle charged from brake/tail lights, with low battery alert
- Anti-theft tracking alerts
- Easy installation
- Over the air (OTA) upgradeable firmware
- Passive tracking mode to conserve power with reduced polling frequency when external power is disconnected
- Varying GPS data transmission intervals to preserve battery life
- Operates on the 4G network, with 3G fallback
- Data Max Pack - 10mb/month
- Advanced accelerometer
- Stolen asset tracking
- System tamper alerts

MONITOR
MOVEMENT IN
ANY CONDITIONS

Options include:

- Remote immobilisation shut down
- Measurement of fuel levels, temperature, generators and solar power levels*
- Driver & utilisation reports
- Custom reporting

*Additional hardware required
