Fuse

SMART FLEETS

Dynamic insurance powered by data for safer fleets and reduced premiums

DATA ANALYTICS

Innovative pattern AI technology that converts GPS data into new crash probability insights

INSURANCE

Dynamic behaviour-based insurance that rewards safe driving and enables accurate pricing of premiums

CLAIMS

Digital claims management solutions for better, faster and more cost efficient claims

IMPROVED SAFETY AND FAIRER INSURANCE

Imagine a world where you could benefit from complete transparency across your fleet's safety, risk and claims, while accessing fairer insurance premiums because of your fleet's connected technology.

At Fuse Fleet, we take a revolutionary approach to driver risk management. Working with your telematics provider, we use artificial intelligence (AI) to uncover new crash probability insights from your telematics data, resulting in fairer fleet insurance premiums.

Even better, because the AI reveals new layers of risk intelligence, you gain new easy-to-understand management insights to support risk mitigation and reduce crashes.

KEY BENEFITS FOR YOUR FLEET

- Precision pricing driving better profitability
- Risk mitigation for improved loss ratio and fewer road injuries
- Reduced premiums for good driving behaviour
- Real-time analysis of driver data to support safety goals
- Access to driver training
- Digital claims and 24/7 real time reporting
- Rebate structure for improved driver behaviour
- Dedicated account manager with expert knowledge of behaviour-based insurance

HOW THE TECHNOLOGY WORKS

Fuse Fleet is proud to partner with Euclidic Systems, an Australian owned and operated telematics company, and Greater Than, a driving data analytics company.

As soon as a trip starts, Euclidic collects real time, super accurate telematics data utilising multi channel GPS signals for high accuracy positioning (with back up memory for when you're out of 4G network coverage). Greater Than's AI collects and analyses this data and compares patterns in behaviour against a database of over seven billion previous trips, so we can rapidly determine a driver's crash probability.

This allows us to price insurance premiums more accurately and provide your fleet with valuable insights to improve safety. While our fully digitally enabled claims management solutions can reduce your fleet's claims lifecycle.

NEW RISK INSIGHTS

By uncovering new risk insights from your telematics data, we can reveal previously unseen intelligence about your fleet's driving habits and offer recommendations on how to improve safety, implement the correct training and prevent crashes.

FAIRER INSURANCE

Because we can accurately identify crash probability for drivers across your whole fleet, we can price insurance premiums more accurately, giving you reduced premiums for good driving behaviour and peace of mind that you're paying the right premium.

WHY FUSE?

At Fuse, we have over 30 years of experience in motor fleets and risk advisory services. We are one of Australia's only providers of behaviour-based insurance with claims management solutions.

Our new digital insurance offering, tailored specifically for fleets, can transform the way your fleet manages risk by bringing you the very latest in AI technology. With us, you retain all the benefits that come from working with our telematics partner, Euclidic, while discovering new fleet data insights that will take your risk management to another level and, importantly, secure the most accurate insurance premiums for your fleet.
