

If you have off-road assets in your fleet, you often have a complex range of tracking needs.

You can just monitor the basics (temperature, power, fuel, battery levels and more), or add features so that the safety of your asset and its operator are no longer in question.

Monitored through management and administration dashboards, with real time tracking of location and telemetric data. it's invisibly installed under the dashboard in weatherproof casing. Up and running within 30 minutes.

And with OTA upgradeable firmware, downtime is close to nil.

Putting you in control of your fleet.

Standard features include:

- Real time, super accurate data stream
- Ability to access the vehicle's CAN Bus system
- Multi-channel GPS signals for high accuracy positioning
- Powerful accelerometer to measure braking, acceleration and cornering forces
- Back up memory when out of 4G
- Over The Air (OTA) upgradeable firmware
- Adjustable polling frequency from 1/second to 1/day
- Geofencing
- Rollover alerts
- Crash and Incident reporting
- Audible alerts for speed and fatigue management
- Stolen vehicle tracking
- System tamper alerts

THE SAFETY OF
YOUR ASSET AND
ITS OPERATOR IS
NO LONGER IN
QUESTION
