

Customer Testimonial: Wasco Australia

Client Contact	Mareta Heveldt
Products Used	Fleet Trakka Premium with Satellite
Length of Relationship with Euclidic	5 years
How are Euclidic's products used?	To ensure the tracking and safety of our vehicles and staff

Wasco Australia work across many sectors, including oil & gas, water, renewables, mining, power and petroleum.

We have worked with the Euclidic team for the last 5 years and have found their service to be consistently efficient and their staff helpful.

Not only are they always on hand to provide additional support services as required, they work hard with their third party partners to provide us with fast installation services.

Importantly, Euclidic's products enable us to provide additional safety measures for our field staff.

Often working in remote areas, they can be driving vehicles like prime movers in outback locations, so we rely on Euclidic to provide an extra level of security for our staff.

Apart from vehicle tracking, Euclidic have fitted all of our vehicles with Duress Buttons, so in the case of an emergency, our staff can alert us quickly and easily and so that we're able to locate them without delay.
