

Customer Testimonial: NextFleet

Client Contact	Ben Chapman, Operations Manager
Products Used	Fleet Trakka
Length of Relationship with Euclidic	6 years
How are Euclidic's products used?	All customers who order telematics are provided with Euclidic products

Recently, one of our vehicles was stolen. The driver of the vehicle reported the case at 10am via email to Euclidic's Helpdesk.

By 10.30am, the driver was contacted by the Euclidic team, and the location of the vehicle was identified. It had been stolen at approximately 3.25am, then driven 30 minutes away.

Approximate location data was provided, and the Driver agreed to take the details to the local police station.

At 12.10pm, the Police were on the scene, and the vehicle was found. Police arranged to tow the vehicle away safely for investigation.

By 12.30pm the Driver reported the successful recovery results to Euclidic.

The rapid action by Euclidic and contact with Police resulted in the undamaged recovery of the vehicle within little more than an hour.

Without the services of Euclidic, this would have been a much more painful and protracted exercise. And possibly not a successful one.
